# We stand for Swedish Quality

With 100 years in the catering industry

For over 100 years now, August Lundh have delivered sustainable and quality assured products for commercial kitchens and the travel catering industry. Travel Catering by August Lundh products are designed to comply with the demands of the transportation industry, mainly airlines and railroad. We offer off-the-shelf solutions as well as customer unique products, all carefully produced in our own production site located in the Greater Stockholm area of Sweden. Our innovative product line has been the foundation for long-lasting collaborations and partnerships with many customers and suppliers.

We place high demands on our suppliers and partners, and we therefor only work with the best companies on the market. Our sister company manufactures most of our products. Mälarpplast are experts in the field of plastic material, and they have the production facilities to provide August Lundh and our clients with everything we need, from custom colours and print to completely new product designs and solutions. The production follows LEAN/5S and ensures full traceability and quality control of each product batch. August Lundh and Mälarpplast are both environmentally and quality certified according to ISO 14001 and 9001.

We at August Lundh are constantly working to contribute towards the environmental goals, but we also want to do more than just comply with current legislation. Therefore, we are investing in innovative, environmentally friendly raw materials, recycling and cooperation's with like-minded companies. In 2019 we launched a circular system together with Mälarpplast. Green Loop is a circular system in which products for commercial kitchens are reused in the business instead of being bought in, used and then thrown away. We offer a unique model where we make use of the beneficial properties of thermoplastics and reuse it 100% for the best possible environmental outcome.

Our vision is to be the market leader of our field. We achieve this by continuing to develop our business to meet the catering industry's high demands and expectations. We manufacture products for the world we live in and the world we want to leave behind.

Yours sincerely,  
Peter Wall

Managing Director  
August Lundh AB

## QUALITY, SERVICE AND TIMELY DELIVERIES

High quality products, excellent customer service and timely deliveries are our key concerns. In order to be the best we only work with the best. Close relationships enable us to hold a substantial stock inventory as well as being able to quickly produce on demand. Our sister company Mälärplast manufactures most of our Travel Catering and Malko products.

### AB Mälärplast

August Lundh are part of the Wallent Group, an industrial conglomerate also controlling our sister company Mälärplast who produces most of our Travel Catering products. Mälärplast are experts in the field of plastic material and have the production facilities to provide August Lundh and our clients with all types of plastic products. Mälärplast can offer special colours, print, materials or even entirely new designs on request.

The production is run in accordance with LEAN/5S and ensures full traceability and quality control of each product batch. Naturally they are also certified according to ISO standards 9001 and 14001. Mälärplast is constantly working on environmental improvements and minimizing production waste. This is why many of the parts manufactured by Mälärplast originate from recycled materials or bio plastics.

### Roltex NV

Roltex is Europe's leading manufacturer of service trays and unbreakable drinkware. The clever designs go well with their eco-friendly and sustainable way of thinking. Roltex has a wide selection of products where most products are customisable. Their motto "Our tray, Your way" takes company branding to a whole new level.

### Stellar Travel Supplies

Stellar Travel Supplies are offering airlines and airline caterers worldwide an extensive range of high quality products worldwide. They have spent 37 years earning the confidence in this business. They have worldwide exclusive relationships and with their deep experience and connections has the possibility to customize your trip.

### Churchill

Churchill has impressive 225 years of experience in their business. They supply superior quality ceramics worldwide. With their substantial global network of distributors they can offer a first class service. Churchill can offer a wide range of choices to their customers with a portfolio that contains over 3000 products.

### Aterin

Aterin produces cutlery that are reusable and recyclable. They reduce the need of single use cutlery, helping to decrease the effects of non-sustainable materials on our global ecosystem! Their cutlery can withstand temperatures up to 120 °C and can be rewashed as many times as needed.

### Engineerethics

Engineerethics is a design and engineering consultancy based in Italy. Their team design and engineer all aspects of airline and railway catering systems: configuration, equipment, trolley, galley inserts, amenities and passenger's comfort products.

## Ergonomic hints

### For service onboard

Service onboard is often fast paced, and with the addition of a tight space and limited time there is a high risk of work related injuries. Our serving pots have ergonomic qualities that improve the work environment. Use these hints to make the most out of your pots!

- ✓ Hold the pot close to your body when serving
- ✓ Use the backrest of the seat for support whenever possible
- ✓ The shorter the serving distance and the lighter the pot, the less strain there will be on the shoulder and arm
- ✓ The distance between the pot's centre of gravity and the wrist is important for reduction of strain on the forearm muscles
- ✓ Too much strain on the forearm can cause a "tennis elbow"
- ✓ If you change your grip on the handle (downwards) during the serving, you will minimise strain on the wrist
